

➤ Elma 2700X voltage tester with open clamp

Smart multi-tester with an open current clamp

The Elma 2700X is a very clever re-invention of the voltage tester.

The Elma 2700X has all the same smart features as the Elma x-one, but comes with fixed test leads in extra strong quality, in contrast to the x-one's detachable and extremely thin and flexible cables. In addition, the instrument housing is stronger and has a more solid design, just as you can "feel" the voltage, as Elma 2700X vibrates when measuring voltage.

The Elma 2700X is a smart multi-tester that combines the voltage tester with an open current clamp, which makes the instrument suitable for most electrical tasks, L-AUS work and detection of voltage-free condition, where it is mandatory to use an instrument that complies with the voltage tester directive.

Features:

- Perfect for measuring on charging sockets and charging stands EVSE for electric cars
- Voltage test, 2 poles with LEDs 120... 1,000V AC / DC
- Voltage measurement with digital display 1... 1,000V / 1,500V AC / DC
- Current measurement with slim current clamp 0-200A
- Review test
- Resistance measurement 0-100kΩ
- Pole finder, one-pole voltage test which indicates the phase
- Phase sequence / turn field test, 2 poles for 3 phase networks
- Large clearly lit display and high-efficiency LEDs
- Self-test and auto on / off function
- Diode warning in case of dangerous voltage without battery - for L-AUS work
- Complies with the voltage tester directive for checking the de-energized state
- Very powerful fixed wires with Interchangeable test tips 2 / 4mm
- Built-in powerful flashlight
- Delivered including delicious belt bag

Attribute	Value
AC A range:	0.1...200A
AC A resolution:	0.1A
Auto power off:	30 S
Battery:	2 x 1.5V LR03
DC V resolution:	0.1/1V
DC V range:	1..1500V
Dimensions:	220 x 65 x 40mm
Display:	LED & LCD
AC V range:	0.1...200A
AC V resolution:	0.1/1V
Continuity test:	0...500kΩ
IEC 61010 Category:	IV 600V
Enclosure class:	IP64
Test current A:	<3.5mA
Weight:	230g
