

➤ Elma Laser X2 green cross laser for increased visibility Rugged, IP54 for every environment

The Elma Laser X2 uses the latest technology with a green laser light, for enhanced visibility. The Elma Laser X2 provides perfect markings even in long range, which eliminate the need to draw on the floor, walls and ceilings. Helping the task of installing shelves, paintings, kitchen tables etc.

The Elma Laser X2 indicates single, dual or triple axis 360°, and is perfect leveling in all dimensions. Both fast and easy, and hands free to work - just place the laser and turn it on. It is also self leveling, and if the deviation is too big, the laser indicates by fast blinking, which makes operating error impossible. Aswell as horizontal and vertical 360° lines, you can also make straight lines in sloping angles, this is useful for stairways etc. Lock the Elma Laser X2 to deactivate the self leveling mechanism, and set the angle, simply by placing on standard tripod or on the supplied magnetic adapter. When the leveling is locked, the Elma Laser X2 will indicate, by blinking every 3 second, to prevent mistakes. As additional safety against errors, Elma Laser X2 can't be turned off, when the lock is deactivated, securing the pendulum suspension against transport damage.

The Elma Laser X2 includes batteries, manual, nylon bag and magnetic adapter.

Features:

- Green light laser for enhanced visibility.
- Single, dual or triple axis 360°.
- Self leveling mechanism.
- Eliminates the need to draw on the floor, walls and ceilings.
- Magnetic adapter included.
- Batteries included.
- Nylon bag included.

Attribute	Value
Visual Range:	To 45m depending on light
Vertical Accuracy:	±3mm@10m
Horizontal Accuracy:	±3mm@10m
Self Leveling:	≤4°
Self Level Time:	≤5s
Laser:	Class II 510nm, 40mW
Mount Thread:	1/4 inch
Battery:	4 pcs. AA 1,5V (incl.)
Power Supply:	230V to Micro USB (Incl.)
Battery Life:	≥4t @ 2 lines
Protection class:	IP54
Dimensions:	95x80x60mm
Weight:	240g
